DETAILED ACTION

Response to Amendment

1. This communication is in response to the amendment filed on Jan. 16, 2007.
2. Applicant's amendment and remarks, with respect to objection and rejections under U.S.C. 112 1st and 2nd paragraph, 102(b) and 103(a) have been fully considered and are persuasive. The objections and rejections have been withdrawn.
3. The following is an examiner's statement of reasons for allowance:

The present invention is an apparatus and method for transmitting a CDMA code data between a transmitter and receiver by using the hierarchical CDMA spreading data burst.

The closest prior art, Ozluturk (US Pat. No. 5,748,687) shows similar system method, which for generating code sequences can be transmitted through CDMA channel.

But Ozluturk fails to teach the CDMA coded data is a form from a root code by Kronecker multiplication using more than one code generator, which can generate a spreading factor for the root code, is smaller than a spreading factor for a corresponding hierarchical CDMA code.

Therefore, the instant application is allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Chang whose telephone number is (571) 272-3129. The examiner can normally be reached on Monday - Friday from 8 AM to 5 PM.
